Summary

Web Developer with a strong front-end foundation and prior professional experience building and maintaining production websites. Focused on accessible, mobile-first design using modern HTML, CSS, JavaScript, and React, with MERN fundamentals and refreshed training.

Experience

Media Manager — Bainbridge Arts & Crafts | 2019

Maintained website content (Squarespace), edited marketing assets, produced email campaigns (Mailchimp), and managed social media content in collaboration with staff.

Writing & Research — Personal Projects | 2016–Present

Completed long-form research and writing projects, developing strong editing, structure, and self-management skills transferable to development work.

Program Lead — School Robotics Program | 2012–2016

Designed curriculum, founded and led a LEGO Mindstorms EV3 robotics program, secured grant funding for equipment, and led teams to FIRST competitions.

Web & UI Developer — Contract Roles | Prior Experience

Amazon • Microsoft • Corbis • Ascentium • Docusign • Farmers Insurance
Built standards-compliant, accessible web interfaces from designer comps in agency and enterprise environments. Worked with libraries such as jQuery and Mootools.

Specific job roles:

Amazon

UI developer on the Kindle team, wielding JavaScript to adapt eBooks such as children’s books and anime comics to enable text to wrap correctly around images at various font sizes.

Corbis

On the front-end team, rebuilding the website from the ground up. The site highlighted images for sale - central to the business model.

Microsoft

Expression Web – on the team making a then-new web site building IDE
Store – on the team maintaining Microsoft’s only online retail arm
Various v- roles troubleshooting, whilst working at Ascentium (an agency)
